Where have we discussed the Uses and Properties of Proteins? (Use this table to record as many different circumstances as you can in which the concepts relate to this topic apply. Don't just record the obvious ones mentioned explicitly by the instructors, learn to find others. Compare yours to your partners from time to time. If you fill this one, print another!)

Situation	Description	Scenario /Lab
Metabolism	Metabolism is the sum of all the chemical and energy transformation in the body. In living systems, almost all of these chemical reactions involve <u>enzymes</u> , which are proteins that serve as catalysts.	Fire & Ice Lab 3
